30 Year Architectural Coatings
larson® by Alucoil® ACM is coil coated utilizing DURANAR® coatings from PPG. Backed by a 30-year exterior performance warranty, these (PVDF) fluoropolymer paint finishes contain 70% KYNAR® 500/Hylar® 5000 resins and are formulated to meet or exceed industry performance requisites such as AAMA 620 and AAMA 2605. Our 29 standard colors are matched to a combination of popular ACM and steel foam panel colors – enabling greater flexibility and design choice.

Solid Color Series
These Duranar® 2-coat colors consist of a 0.2 mil primer and a 0.8 mil color coat, for a nominal dry film thickness of 1.0 mil.

- Regal White S-31
- Off White S-91
- Bone White S-30
- RVW White S-327
- Oyster White S-70
- Marble S-112
- Sandstone S-84
- Limestone S-58
- Cadet Grey S-32
- Charcoal S-381
- Classic Bronze S-33
- Classic Black S-34

Finished Panel Inventory:
ACM and Matching Flat Sheet
All standard colors are available in 62" coil and inventoried ACM panels. Select colors are also available in 50" width. Matching 0.040" thick x 48" wide flat sheets are available in select standard colors. Please consult for finished goods inventory availability.

Metallic Color XL Series
These Duranar® 3-coat metallic colors consist of a 0.2 mil primer, a 0.8 mil color coat, and a 0.5 mil clear coat, for a nominal dry film thickness of 1.5 mils.

- Silver Metallic XL-25
- Gun Barrel XL-382
- Pewter Metallic XL-65
- Champagne Metallic XL-26
- Rustic Copper Metallic XL-27
- Bright Copper Metallic XL-28

Mica Color Series
These Duranar® 2-coat mica colors consist of a 0.2 mil primer and a 0.8 mil color coat, for a nominal dry film thickness of 1.0 mil. Mica flakes are suspended in the color coat – giving the appearance of a metallic finish.

- Anodic Clear M-35
- Platinum M-36
- Silversmith M-115
- Champagne Mica M-38
- Champagne Pearl M-60
- Champagne Bronze M-94
- Aged Bronze M-367
- Pewter Mica M-366
- Medium Grey M-301

Mica and Metallic XL Colors are directional in nature therefore proper estimating and installation precautions should be taken to ensure that panels are all installed in the same direction. Directional arrows are printed on panel protective film to aid in this practice.

Due to the reflectivity of these finishes, optical perception of color tone may vary according to the angle from which panels are viewed, reflected light off of other structures, and different angles or planes on which panels are installed on a building elevation.

To ensure color consistency with these finishes, it is highly recommended to order all material required at the same time, be they in single or multiple widths.
